Here is a rhetorical treatment of Karl Barth's early theology, although scholars have long noted the rhetorical power of Barth's work, calling it volcanic and explosive. This book uses rhetoric to illuminate the peculiar nature of his prose; it displays a Barth whose prose is radically unstable and inseparable from his theological arguments. The author connects Barth's early theology to the expressionism of the Weimar Republic. He develops an original theory of figures of speech, relying on the philosophies of Paul Ricoeur and Hayden White to delve more deeply into the particular configurations of Barth's writings. Nietzsche's hyperbole and Kierkegaard's irony are examined as rhetorical precedents of Barth's style. The closing chapter surveys Barth's later realistic theology and then suggests ways in which his earlier tropes, especially the figures of excess and self-negation, can serve to enable theology to speak today. It took all of thirty seconds for two shots to bring the world of Margaret Tabaha crashing down around her after losing her husband in Afghanistan during the first year of Operation Enduring Freedom. Her two sons were all she had left; now they had been taken from her, violently and deliberately plunging her into a whiskey bottle and stripping away her reason for living. When Arthur Nakai receives a call from his first love, Margaret, her voice pleading for his help, it comes as he is attending a wake for one of the men he considered a brother from his days in the Marines 6th Airborne Wolf Pack Battalion, feeling a deep and responsible obligation to help her. social scientists had carried out extensive research into problems of urgent public concern yet their findings were not widely known or understood and they had often been diffident in advocating policies based on their conclusions. Michael Argyle discussed the recent psychological and social research bearing on the origins of aggression, delinquency, mental disorder, racial and international prejudice and industrial discontent. He went on to consider the implications of these studies for prevention and control and for the guidance of social change. This sophisticated and well documented critique is presented with such lucidity and verve that it will appeal equally to laymen and to students and professional workers and can now be enjoyed in its historical context.
